Our mission and vision

We aim xSTIK to become world famous xSTIK figure and community approved official XRP mascot. We want influencers, actors, artists, celebrities, athletes, social media stars and high-level business names to be a part of this project.

These collaborations will be a big part of our concept & marketing. They will help us grow to be the largest and most well-known XRP Token and brand. We want everyone to participate, including you. Now is the time to get on board. The team believes strongly in the xSTIK brand. Let us tell you why.

xSTIK is not typical static NFT with changing colors. It is much more. xSTIK is not boring fifty-pixel face replica that every other group is imitating. xSTIK is lively, artful, and flexible stick figure with endless possibilities. And it comes with a back story that is unique and full of layers. For an investor, collector, XRP and crypto enthusiast, we present a winning concept. High in quality, addictive and visually amazing. We have the future planned! Take a look at our roadmap and come aboard our rocket. You guessed it right. We are going to the Moon and beyond!

The team guarantees to do everything related to the whole xSTIK project with the best possible transparency and quality. We will constantly support the community with offers, giveaways, new ideas and innovating things. Anything that will add value to xSTIK Tokens and brand. We will keep you informed on what's happening and what is to come at all times.

The Story and The Lore of xSTIK

The Beginning

This epic (fictional) story starts from the 1960s. The race to the Space was on and a prototype of a spaceship was developed in secrecy. The builders named it "Coinrocket I." The technology was so unreliable that a decision was made to use Apes as passengers instead of humans.

This experiment would set the tone for all future attempts of conquering the Space. Much was at stake. Two apes, a male and a female were selected to board the ship.

They were accompanied with the latest innovations and gadgets. Nutrition for the flight was gene-manipulated superfood, designed in an underground laboratory. There was no time to test the long-term effects of eating it; This race had to be won!

Finally, the long awaited launch happened successfully and Coinrocket I soared to the sky, soon leaving the Earth's gravity field and disappearing into the vast open Space...

A space scene featuring a grey rocket ship on the left, a large black sphere with a small blue and green planet inside it in the center, and a blue planet with green lines on the right. The background is dark blue with white starbursts.

The X.O. Planet

After several hours of travelling in the space, the ship entered a strange force field. All contact to Coinrocket I was lost, and it disappeared from all mission control radars.

The apes watched as the space in front of them started to bend and the starlight got brighter around them. After a moment the visibility was back, and a large green planet could be seen directly on the course of the ship. A wormhole had taken the apes across the universe, to a whole new galaxy. Now how about that! As the ship approached this yet unknown sphere, later to be known as the X.O. Planet, the landing procedures were started automatically.

The ship landed on an unhabitated land that looked like a paradise at first glance. As the door opened, the air was breathable and the apes started to study their new home with great enthusiasm.

But soon they discovered that there was not much to eat. All they could find was the gene-manipulated superfood in the ship. But gladly there was lots of it, as Coinrocket I could generate more food just by using sunlight and several raw ingredients found on the planet. So, the nutrition problem was "solved" but with some unexpected consequences.

The Mutation

Within the first weeks, the apes started to feel strange.
Like some weird energy was flowing through their cells.
This soon resulted in an ability to communicate by primitive words!
The male ape was named xADIUM and the female xEVIUM.
A whole new world opened in front of them.

As their intelligence grew, the apes started to build a society on the planet.
The first cities emerged over the next decades.
But the evolution and the mutation didn't stop there.
Oh no. It was just getting started and the pace was fast!

During the next few hundred years, the ape population evolved into
modern day humans. Yes, to us! Very excited about the superfood benefits,
the X.O. Planet habitants continued to improve the recipe.
It seemed like there were no limits in the future!

The Humanoids

Now as 500 years habiting the planet had passed, humans had continued to evolve to alien-like humanoids. Large heads, big eyes, small mouth, tiny nose... you know the deal. Cities had grown to host hundreds of thousands of citizens. However, this started to build pressure on the X.O. Planet's ecosystem and superfood production. Something had to be done.

So, one day an inventor, a wise humanoid named XeRP Stikenheim proposed a solution to the great council. He had plans to create a highly-intelligent, supreme being that would solve all problems in its infinite wisdom. Stikenheim got the funding he needed and started a project in his lab called simply "The Stik Figure Experiment." He felt this name would serve the purpose well, as it represented the perfect form for a being. Complete and beautiful in all its simplicity.

The New Era

After two years of intense research through several development phases, XeRP Stikenheim made a breakthrough.

He had reached his goal; a supreme being was ready to emerge.

He shut down all the lights in his laboratory and started the pulse generator.

But suddenly it got overheated! The energy was too much for the system and caused an explosion, leaving the lab to ruins. As the dust settled, Stikenheim thought that all was lost. But oh, was he wrong. In the middle of all the rubble, a new lifeform was standing.

Stikenheim approached it slowly with caution as he didn't know what to expect.

"This is what Frankenstein must have felt," he thought.

The lifeform looked perfect and complete in every way!

The experiment had succeeded and produced something amazing!

Stikenheim introduced himself to the being and they engaged in an interesting conversation about the Universe.

A new era in the history of the X.O. Planet had begun.

The xSTIK

Very quickly the being wanted to identify itself. As a homage to its creator, it chose to be named xSTIK One. This would soon become a name all in the X.O. Planet knew very well. xSTIK One participated in all fields of science, teaching and innovating great things for the humanoids.

The cultural impact was huge too. xSTIK One composed music, poems, plays, you name it. Like a radiant infinite force, lighting the way to a brighter future!

xSTIK One felt lonely at times though and it needed equal company. So, it rebuilt XeRP Stikenheim's lab and started creating clones of itself. But not exact copies; each with their own distinctive characteristics and personality. First creations were very special, so they were named xSTIK Two, xSTIK Three and so on to a full Hundred.

After some years, X.O. Planet started to feel small for the growing numbers xSTIK beings. There were thousands of them. Time was right for a new phase in this story to begin...

The xSTIK's intergalactic voyage to planet Earth

As the xSTIK beings entered their anti-gravitational superships, named xWEALTHLANDER ships, capable of interstellar travels, the whole planet was cheering. It was decided that everyone who wanted, could leave. This level of intelligence can't be suppressed or contained.

At first, they set course to the X.O. Planet's moon, a dull rock called xMOON with just high mountains everywhere. They explored it quickly and decided to move along. The first ship lifted off the xMOON and their voyage to the Galaxy begun.

The xWEALTHLANDER I entered the space-time wormhole. The ship went through and soon emerged from the other side. Strangely the fabric of the universe had bent in such a way that during all this time on X.O. Planet only a little over fifty years had passed on Earth. It was year 2021 here. And us humans were about to be amazed!

The story continues and YOU come along

You might wonder why of all the planets in the Universe, the xSTIK beings chose that Earth was the place they wanted to go next. I can't tell you the exact reason. Perhaps they found out somehow where the spaceship Coinrocket I originated that brought the apes xADMIUM and xEVIUM to X.O. Planet so long ago. Maybe. But the reasons are irrelevant really.

Most important thing is that they are now coming our way. In several different ships, occupied by several groups of xSTIK beings. Get ready Earth! Get ready to meet the supreme beings called xSTIK! They are landing soon in their xWEALTHLANDER ships. And we can't wait to see what they look like and what they can teach us! Stay tuned of what's to come!

...LAST MINUTE INFORMATION: It's now confirmed that xSTIK beings are planning to build a colony also to our Moon! So, they will go there eventually. It's just a question of time as the Lore continues!

xSTIK Drop Zones & NFTs

Welcome to our innovative xSTIK Drop Zone.
This is something you have never seen before.
We all have seen so many crypto- and NFT-projects being started with the same idea.
Our team wanted to create something new, something special.
Something that will keep you interested!

So as you already know, xSTIK project aims to bring the official XRP Logo to life - and to be a part of all XRP holders' everyday life.
We want to give a chance to everyone in xSTIK community to participate in our Drop Zones.

So what are these Drop Zones?

xSTIK Drop Zone is a section of our website that creates new possibilities for everyone in our community to participate.
There will occasionally be for example; NFT drops, Giveaways, Merch drops, xSTIK Token drops and much much more.

Beside just favoring the ones who already hold xSTIK Tokens, we want to make sure everyone can participate.
Drop Zone opening dates will be announced in our Telegram, Twitter and website, so make sure to follow us and you will never miss an upcoming Zone.

When will Drop Zones begin?

We will reveal dates for the first three Zones right at launch.
After that we will announce all upcoming Zones in good time before they will go live.
They will be much anticipated events you don't want to miss!

xSTIK NFTs – The Tier Cards

Dear future millionaires, we have now introduced you our mysterious and special xSTIK Drop Zones. The Team has created a dropping plan, which includes different methods to get yourself a unique xSTIK NFT. We have six types of NFT collections, all of which have various different features like tier, amount, theme, and specifics. When an NFT Drop Zone opens, it includes an undefined number of NFTs at a time. For an example, there will be Zones that reward xSTIK Token holders, Twitter giveaways, various contests, and also very unique collections which will be sold only at auctions in the NFT Marketplace. Our holders will be always be well rewarded. The more you hold - The more you benefit. But also smaller investors and holders will not be forgotten. Every Drop Zone can happen more than once! Each is special with its contents. You might get an NFT with steel, bronze, silver, gold, custom or diamond frames. Everything is possible! This will keep things interesting! Stay on the edge of your seat...

Want one? Or many? Keep following us to see when a Drop Zone opens. And be ready! Trust us, we will keep surprising everyone. Drop after drop. So once more; STAY TUNED and FOLLOW!

xSTIK NFT Card Tiers

1. Common
2. Rare
3. Epic
4. Legendary
5. Custom
6. Mystery (All details classified)

COINS 589

Roadmap

Phase 1 2021

- Launch
- Website
- Whitepaper
- Telegram & Twitter & Instagram
- XUMM Verified
- Airdrop
- Blackhole account
- NFT concept and Tier Cards

Phase 2 2022

- Building a strong and vibrant community
 - Heavy marketing & growth
 - Exchange listings
 - Merch store (wear the brand)
 - Giveaways
 - NFT drops & auctions at Marketplace
- xSTIK becomes community approved OFFICIAL XRP MASCOT

Phase 3

- xSTIK to become WORLD FAMOUS XRP STICK FIGURE
- More NFTs, Drop Zones and auctions
- Own Game (executed by an outside company)

We're planning a genius way to launch xSTIKVERSE with free accounts accessible thru a minigame. This world will contain marketplaces, challenges and missions using xSTIK as currency.

©xSTIK

Tokenomics and the distribution

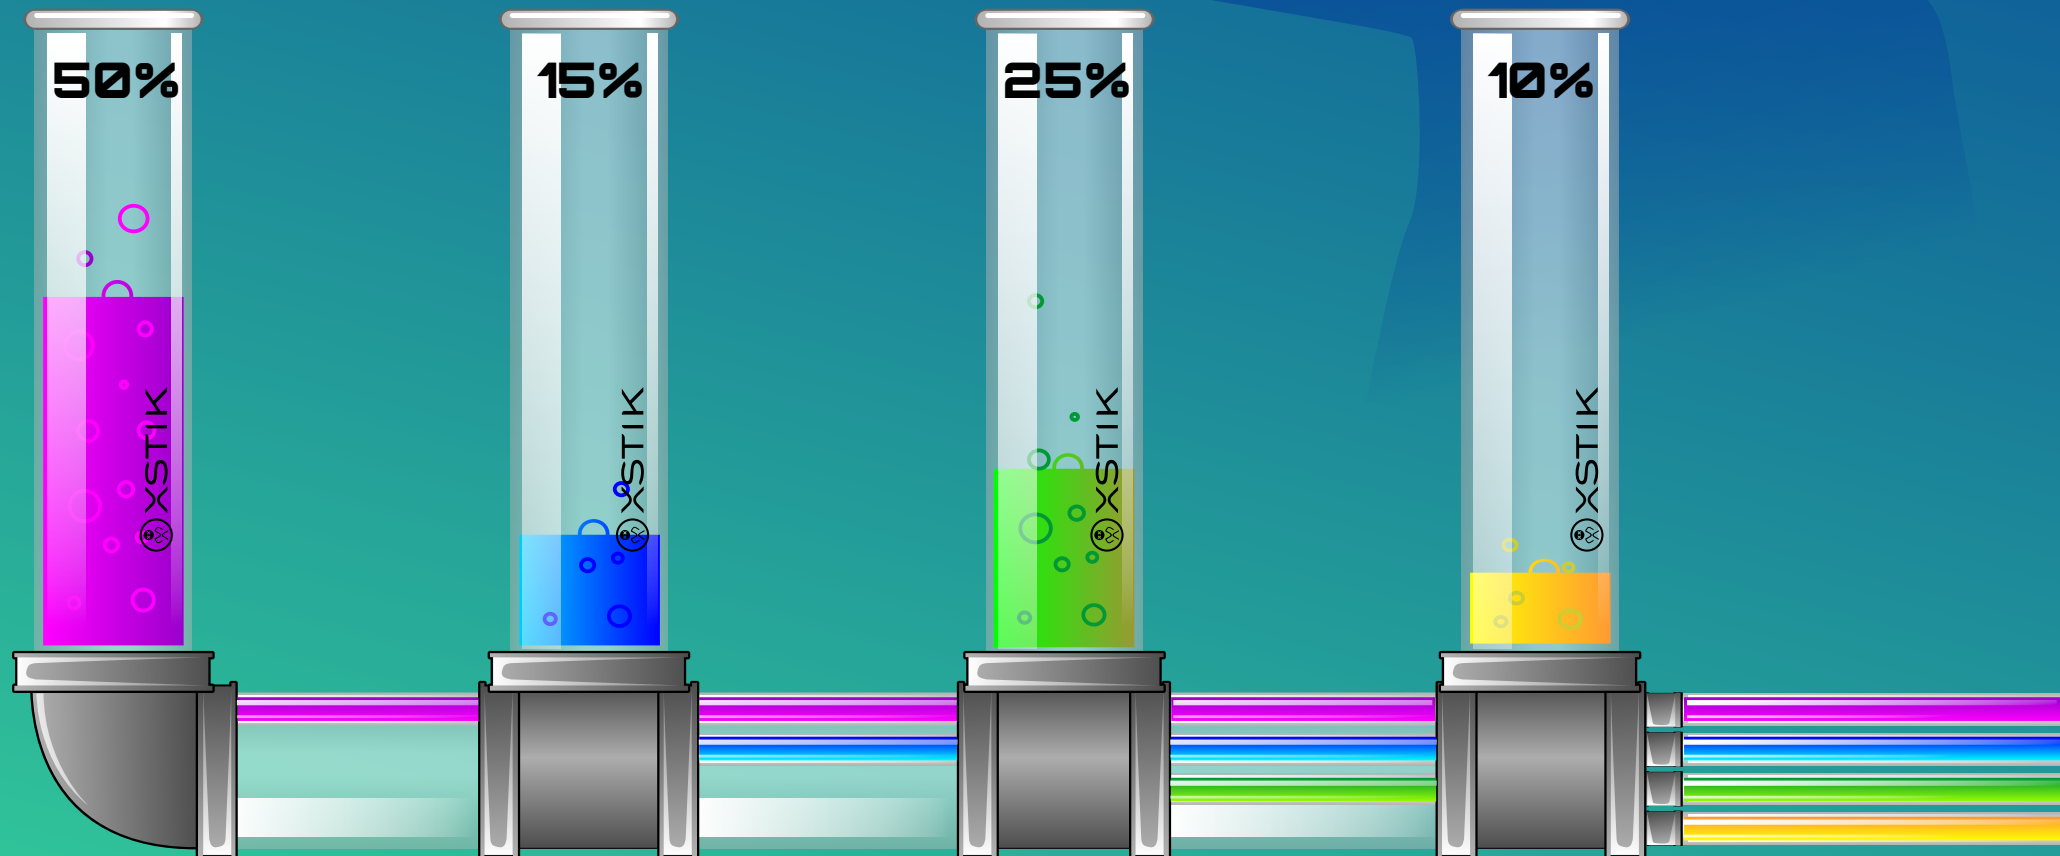

xSTIK total supply is 1 Billion (1.000.000.000) Tokens.
They are distributed as follows:

AIRDROP

MARKETING
PARTNERS
GIVEAWAYS

DEVELOPMENT
AND
OPERATIONAL
COSTS

TEAM

Who are we? The Team

We are enthusiasts of cryptocurrencies and XRP. We are here to make a change. On this journey to success, YOU are invited to join us. Together this will happen. We will earn your trust and support.

What is the XRPL and what are NFTs?

The XRP Ledger (XRPL) is a decentralized, public blockchain led by a global developer community. It's fast, energy efficient (compared to mined currencies), and reliable. With ease of development, low transaction costs, and a knowledgeable community, it provides developers with a strong open-source foundation for executing on the most demanding projects, without hurting the environment. The lower fees, faster transactions and custom token functionalities make the XRPL ideal for building an ecosystem of NFTs.

What are NFTs?

The total market cap of NFTs surged to a new all-time high of \$10.7 billion during the third quarter of 2021. That is an increase of 723% when compared to the second quarter of 2021 when total sales in NFTs reached \$1.3 billion.

Although NFTs were mainly traded on the Ethereum blockchain, more and more NFT projects are being launched on other blockchains. Demand for NFTs is soaring and the NFT environment is developing at a rapid pace. But what are NFTs exactly? NFT stands for non-fungible token. This means that it is a token active on a blockchain that demonstrates proof of ownership.

Each token is completely unique. Due to the unique metadata of each NFT, its characteristics cannot be changed and the NFT itself cannot be duplicated.

Authenticity: Blockchain technology provides proof of ownership. This is the primary benefit for NFTs as all transactions are recorded on the ledger. In addition to this, thanks to the transparency blockchain technology provides us with, both fraud and duplication can easily be prevented.

Exclusion of a middleman: Due to the fact that transactions are executed peer-to-peer via the blockchain there is no intervention of a middleman. This has resulted in artists being rewarded more fairly for their effort.

Value: Many factors contribute to the overall value of an NFT. The main being immutable ownership and digital scarcity. Regardless of the amount of time that passes, you will always have the opportunity to authenticate an NFT within a few minutes.

Easily transferable: Due to the underlying blockchain technology, NFTs can easily be transferred peer-to-peer to anyone in the world at any time.

Proof of community: There are several NFT collections with both a massive and loyal following. All projects hold in common that they have a buzzing community. NFTs can serve as the perfect gate key into certain levels within the overall communities.

DISCLAIMER

xSTIK Team is obliged to inform current and future xSTIK holders about the accompanying risks for users when spending money on the blockchain technology. Holding xSTIK represents an understanding and willingness to accept the risks that accompany spending money on blockchain technology. These risks include, but are not limited to the following:

Policy risk: Constantly changing political and regulatory trends (legislation) may lead to significant price volatility.

Transaction risk: The behaviour of traders on the secondary market will always have an influence on the price of xSTIK. The secondary market for currencies that utilize blockchain technology has significant volatility which may drastically affect the value of your xSTIK token.

Technical risk: Blockchain technology is a rapidly developing technological field. This dynamic environment may lead to many unforeseen technological issues, challenges, but also disruptive trends, all of which may influence the value of your xSTIK.

Operational risk: All operations carry inherent risks on a multitude of factors, which may be caused by factors such as illness of essential stakeholders, major strategic disagreements, breakdown of essential equipment at key moments and so forth. Operational risks may always influence the success of the project and/or the value of the operations assets.

Potential buyers of the xSTIK token must realize this responsibility and conduct rigorous and careful analysis. The introduction and description of the basic condition of the project in this document is an invitation to the general public. It's not a commitment nor a guarantee. The xSTIK Team and Founders can't be held liable for any direct or indirect damages that might result from investing to xSTIK Tokens or NFTs. You invest always at your own risk.
